OUR SERVICES

Pattillo Construction Corporation approaches each project as a partnership, constructing every building as though we were going to own it ourselves. By looking through an Owner's perspective, we are able to overcome challenges and implement innovative solutions to reduce cost and maximize efficiency, without sacrificing design intent. A single source flexible solution, we provide full in-house design and construction services which enables early team collaboration within the initial conceptual stage. Our streamlined approach, reduces risk by overlapping the design and construction phases to conduct a value-engineering analysis to maintain and facilitate the project schedule.

Predevelopment • Preconstruction

| site analysis + test fit | site planning | master planning
| scheduling | existing facility evaluation + survey
programming | cost estimating + value engineering |

Construction Management

| estimating + scheduling | bid procurement |
budget control | field management | safety program
management | start-up + commissioning |

Design • Engineering

| architectural BIM design | space planning + interior
design | warehouse planning + design | permit plans +
construction docs | team selection procurement |

Construction Delivery

| build-to-suit | renovation + expansion | manufacturing
+ industrial | distribution + supply chain | interiors +
tenant improvements |
